NRC PROPOSED RULE 10 CFR PART 50

Dear Mr. Secretary:

I wish to state my strong opposition to the Nuclear Regulatory Commission's proposal to amend its rules regarding offsite emergency planning at nuclear power plant sites.

There are absolutely no circumstances where the NRC should authorize a full power operating license if the utility cannot meet all of the NRC's current emergency planning requirements.

I believe that my health and safety, and that of my family, are of paramount importance.

I urge the NRC Commissioners in the strongest possible way not to change the rules.

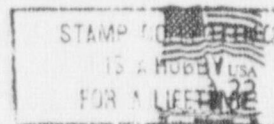

Sincerely,

John Gagliardi
