Attached for your review and use is the VP Milestone Summary Report for the month of July. The report summarizes progress on milestone activities at all sites and is comprised of the following parts:

- o Project Cumulative Status Sheet. This sheet illustrates the numbers of properties which have reached the principle milestones at each site. The sheet also shows the numbers of activities which are awaiting completion in critical areas. This summary sheet is appended with a legend which describes the categories of the status sheet.
- o Outstanding Milestone Activities Sheets. A series of these sheets is provided for each site at which milestone activities are underway. Properties are grouped by RA progress resulting in a graphical representation of properties queued for each identified activity. This file can be electronically transferred to you, if you desire. Contact Andrew Clark if you need a copy transmitted.

The purpose of these two sets of information is to provide a snapshot summary of progress on significant activities at each site, and to help identify the bottlenecks to remedial action completion.

Please continue to review the attached information and subsequently bring to my attention any data which is incorrect or not current. It is very important that the VPDMS correctly reflect progress at all our sites.

Thank you in advance for your review and attention to this matter.
