FOR IMMEDIATE RELEASE
(Wednesday, August 19, 1987)

**NRC RELEASES DOCUMENTS RELATED TO INVESTIGATION
OF STAFF ACTIONS IN TEXAS NUCLEAR POWER PLANT CASE**

The Nuclear Regulatory Commission is releasing documents related to an investigation of NRC activities involving the Comanche Peak Nuclear Power Plant under construction in Texas. Included in the material being made public are a November 1986 report of the Commission's Office of Inspector and Auditor, a March 1987 report of the Comanche Peak Report Review Group, and an April 14 memorandum from the Executive Director for Operations to the Commissioners concerning the Review Group's recommendations.

The Commission has not reached conclusions on the information in the documents being released in view of the fact that it has appointed David C. Williams, Director of the Office of Special Investigations of the General Accounting Office, to conduct a special inquiry into several matters, including the adequacy of the Office of Inspector and Auditor investigation of the Comanche Peak matters.

The documents being made public today contain deletions necessary to comply with the Privacy Act, to protect the names of the persons who requested that their names be withheld for personal privacy reasons, or where the material involved prospective personnel matters.

Copies of the documents being released are available for public inspection at the NRC's Public Document Room at 1717 H Street, NW, Washington, DC, and at the Region IV office of the NRC in Arlington, Texas.
