Trojan Nuclear Plant
Docket 50-344
License NPF-1

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington DC 20555

Dear Sir:

Elimination of Dynamic Effects of Postulated Primary
Loop Pipe Ruptures From Design Basis for Trojan Nuclear Plant

By letter dated August 4, 1987, the Nuclear Regulatory Commission (NRC) Staff requested that Portland General Electric (PGE) provide additional information regarding the elimination of dynamic effects of postulated primary loop pipe ruptures from the design basis for Trojan. It was requested that this information be provided within 30 days from receipt of the letter, or a schedule to provide this information be submitted within 15 days.

PGE has reviewed your request and determined that additional time will be required to evaluate and adequately address each item included in the enclosure to your letter. In addition, in order to ensure an adequate response to your concerns, PGE requests a telephone discussion with the technical reviewers prior to proceeding with our evaluations. Arrangements for the telephone call will be coordinated via the NRC Project Manager for Trojan.

Accordingly, we plan to submit a detailed response to the twelve (12) items listed in the enclosure to your August 4, 1987 letter by December 31, 1987.

Sincerely,

c: Mr. John B. Martin
Regional Administrator, Region V
U. S. Nuclear Regulatory Commission

Mr. David Kish, Director
State of Oregon
Department of Energy

Mr. R. C. Barr
NRC Resident Inspector
Trojan Nuclear Plant
