Re: Docket Nos. 50-275-OLA + 50-323-OLA ✓

I am very disturbed to learn that you are considering increasing the amount of radioactive waste to be stored at Diable Canyon. The increased risk of storing the rods still closer together concerns me deeply and is readily apparent to all. To do this on an active earthquake fault is doubly dangerous and totally unacceptable. I strongly urge that this request be denied. Clearly we should stop producing radioactive waste if we can only provide makeshift facilities for its storage.

Again, I urge you to deny this request.

Sincerely,

Shirley Selkowitz
