

U.S. Nuclear Regulatory Commission
Docket Nos. 50-275 OLA
50-323 OLA
JUL 10 P3:19

I am writing to express my opposition to radioactive waste racking at Diablo Canyon. I realize that money comes before health, safety, or sense, and that your agency does not wish to hinder the Nuclear industry in its profitable shell game. Production of nuclear waste requires far more secure ^{storage} plans than P.G. & E has presented here. Please do the job your title implies -

Regulate! A nuclear accident in heavily populated coastal California ~~and~~ will produce many liabilities..
