June 15, 1987

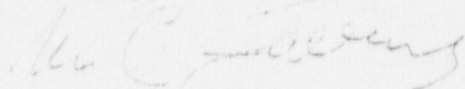

Nuclear Regulatory Commission:

As a resident of San Luis Obispo for eleven years, I urge you not to allow PG & E to store spent fuel on the premises of the Diablo Canyon Plant.

I feel that the plant is unsafe and adding the extra danger of storing radioactive waste further increases the possibility of a major accident which would ruin our beautiful environment.

I speak for many others in voicing my opposition to this waste storage proposal.

Sincerely,

Merrill C. Gaines
