To the Nuclear Regulatory Commission:

Re: Storage of fuel waste on Diablo Site

SIRS:

As a resident of San Luis Obispo I have been concerned since my arrival ⁽⁶⁾ six years ago when Diablo was first activated.

I have been opposed to its operation and continue to be. Now, at this time, the issue is additional storage of waste — on beyond its capabilities.

I plead with you to consider the full ramifications of your activities. The citizens of this area deserve to be heard and to be aware of the decisions made regarding our ~~own~~ environment — and we do not want any storage in this area.

Sincerely,

Sandra Davis Lakenan
