

PROCEDURE

RADIATION FILM BADGE PROGRAM

BOP NO.	REVISION	EFFECTIVE DATE	WRITTEN BY	REVISED BY	APPROVED BY
5	Original	5/29/87	P. MCMAHON	NA	

PURPOSE: To describe the radiation film badge program.

CONTENTS: I. General
II. Procedure

I. GENERAL

- A. The radiation film badge program is supervised by the Radiation Safety Officer or designee.
- B. All employees who work in or frequent any portion of the company's radiation areas shall participate in the film badge program.

II. PROCEDURE

- A. An independent radiation exposure contractor shall ship unexposed film badges to AgriTech Systems. The Radiation Safety Officer (or designee) will distribute the film badges to the appropriate employees.
- B. Employees shall wear the film badges during working hours for a period of one month.
 - 1. Film badges should never be taken home.
 - 2. Film badges should never be laundered.
 - 3. Do not staple, fold, or mutilate in any fashion as this may cause the film to be exposed to light which will cause the badge to be unusable.
- C. At the end of the one month period, the Radiation Safety Officer (or designee) will collect the exposed badges and replace with new badges.
- D. The exposed badges will be forwarded to the contractor for developing and "reading".
- E. Results shall be sent to the Radiation Safety Officer for review/filing.
- F. A copy of the results may be posted by the Radiation Safety Officer each month in the employee coffee room for review by each employee involved.
