**FREEDOM OF INFORMATION
ACT REQUEST**

FOIA-87-787

Rec'd 11-19-87

Attn: Freedom of Information Act Request

Dear Sir:

Pursuant to the federal Freedom of Information Act, as amended, 5 U.S.C. S 552, Public Citizen's Critical Mass Energy Project hereby requests copies of any and all records that provide:

(1) Information on worker training programs at all commercial nuclear power reactors, including security personnel training programs, which have been certified by the Institute for Nuclear Power Operations (INPO) as meeting all its criteria for satisfactory worker training programs. Also requested are records on the status of worker training programs, including security personnel training programs, at all commercial reactors which have not been certified in one or more of the ten areas being certified by INPO.

(2) Information on any reviews, evaluations, or analyses of the INPO program conducted to date or to be conducted by the NRC, INPO, NRC contractors, or any other party.

(3) Information describing any reservations, shortcomings, or other problems encountered by either INPO, the affected utilities, other agencies, or the NRC in the development, implementation or evaluation of this program. This would include, but is not limited to, any documents which note slippage in INPO's or NRC's timetables for this program, any documents which comment on the sufficiency of information provided by INPO to the NRC about this program, or any documents which comment on the quality of the program, the effectiveness of the training, and/or any other criteria NRC or INPO have used.

(4) Any other correspondence between the NRC and INPO and/or NUMARC regarding the development, implementation, or evaluation of this program.

This request pertains to all records in the possession of the U.S. Nuclear Regulatory Commission, its contractors or licensees. In this request, "record" includes, but is not limited to, databases which contain the requested information or any other memoranda,

reports, studies, reviews, letters, computer memories and printouts, audio and video tapes, movies and other forms of communication, in the possession of any individual or office in the U.S. Nuclear Regulatory Commission, whether generated by the U.S. Nuclear Regulatory Commission, its contractors, or any other source.

Public Citizen's Critical Mass Energy Project is a nationally known non-profit public interest organization founded in 1974. We will use these documents in a study we are presently researching and plan to issue on the adequacy of training programs presently in place for nuclear power plant workers. We plan to broadly disseminate the information contained therein to the press and the general public.

Our past publications have attracted attention in the local, national and trade media. Thousands of copies of the reports have been sold or distributed to members of the public, industry, and citizen groups. Since furnishing these documents "will significantly contribute to public understanding of government opinions or activities" we request a complete waiver of any processing or duplicating costs you might incur in providing these records to us. If you rule otherwise, please notify us before filling the request.

Nothing in this request should be considered a request for the private records of any specific individual. Hence, no provisions of the Privacy Act should be deemed applicable.

If all or any parts of this request are denied, please cite the specific exemptions on which you rely in refusing to release the documents.

Further, since the Freedom of Information Act provides that the remainder of a file must be released if only portions are exempt from disclosure, we request that we be provided with all non-exempt portions which are reasonably segregable. Of course, we reserve our right to appeal the withholding or deletion of any information.

As provided in the Freedom of Information Act, we will expect to receive the requested records or a final determination within ten working days. If your office is unable to fully respond to this request in that time, please send us a written estimate of when the request will be completed.

If you have any questions about this request, please telephone me at 202-546-4996.

Thank you for your attention to this request.

Sincerely,

Kenneth Boley
Energy Policy Analyst
