SUMMARY OF FORTY YEAR SPECIAL NUCLEAR MATERIAL REQUIREMENTS -
BODEGA BAY REACTOR - PACIFIC GAS AND ELECTRIC COMPANY, DOCKET
NO. 50-205

Attached is an application by Pacific Gas and Electric Company, dated December 28, 1962 for a license to construct and operate a 325 megawatt (electrical) nuclear reactor at Bodega Bay, California. "Exhibit D" of the application provides supporting data and assumptions relating to the allocation of special nuclear material.

Please provide us with your computation of the allocation of Uranium-235 based on the information furnished in the attached summary, and your statement as to the availability of the material under the Presidential allocation for the civilian application program.
