

that will not contaminate as much
as the present type does. Since changes
will occur in the future why the rush
to build on Bodega? And ~~the~~ does
A. E. C. solely determine issues in
these matters - don't we the people
count?

If it's so safe why won't insurance
companies (locally) want to sell us
a policy against radiation? Oh
sure it could come from "anyplace"
but this is true of other localities
where insurance is readily available.

I am not against atomic
energy being used purposefully -
but to build such a plant near
an earthquake fault merely because
it is convenient, is wrong -

Yours truly,
L. Mc Ewen

Pro - Secretary Udall's opposition to building Nuclear Reactor on Bodega Head.

4081

To The President

102

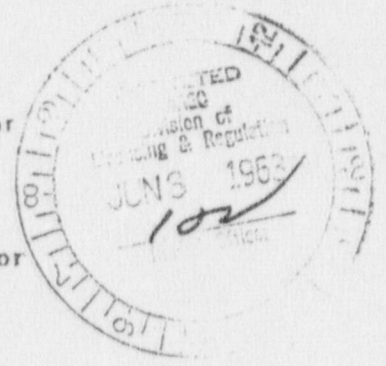

50-205
(Suppl)
L&R File Copy

It was with great pleasure that I read of
Secretary Idell's opposition to the proposed nuclear
reactor to be built on Bodega head.

I trust that the forthcoming AEC hearings
on the plant will look very sharply into the
whole matter of public safety in an atomic reactor
plant to be built practically on top of the most
active earthquake fault in the world.

Sincerely yours,

Carl J. Eklund
