Branch, Division of Licensing and Regulation

TELEPHONE CALL FROM JIM TERRILL REGARDING APPLICATION OF
PACIFIC GAS AND ELECTRIC COMPANY (BODEGA BAY)

On this date Mr. Terrill called and asked for the following
information regarding the above application:

- (1) The name of the individual in charge
of this project for PG&E.
- (2) The names of the ^{principal} possible contractors.

I replied that Mr. C. C. Wheel, Chief Mechanical Engineer
for PG&E is the project contact. I also advised that the
contractors were General Electric Company and the Bechtel
Corporation.

Mr. Terrill asked if copies of the hazards report had been
distributed and I advised that copies were sent to Surgeon
General Terry and Mr. Grandin of the State of California on
January 22.

Mr. Terrill stated that he was leaving for the San Francisco
area on January 28, and related that he would probably be
discussing this project with the California State Health
Department, sometime during the week.

He also stated that he planned to suggest to the California
State Health Department to make contact directly with PG&E
regarding any questions that they may have in connection with
the project.
