Mr. Edward Case
Atomic Energy Commission
Room 228A
Bethesda, Maryland

DOCKET NO. 50-205
Russell

Dear Mr. Case:

Enclosed is a copy of a letter from Professor Emil J. Mateker
of Washington University. Any information you can give Professor
Mateker on Bodega Bay, etc., will be greatly appreciated.

Sincerely yours,

Rutlage J. Brazee

DEPARTMENT OF EARTH SCIENCES

April 29, 1964

Mr. Rutledge Brazeo
U.S. Coast and Geodetic Survey
Department of Commerce
Washington 25, D.C.

Dear Mr. Brazeo:

During the A.G.U. meeting last week I met with Jim Lander. During the course of our conversation Jim mentioned that you had gathered data relative to the Bodega Bay Reactor location problem along the San Andreas Fault. I am interested in this problem and have become indirectly involved in it here on our campus.

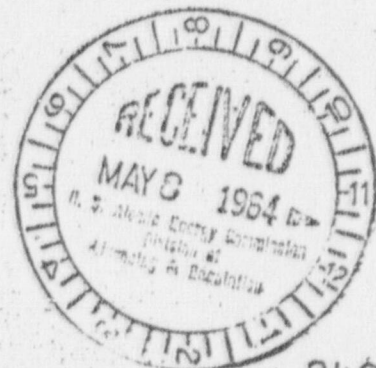

On May 20 I am to address the Physics Colloquium here on earthquake seismology. A number of the people in the Physics Department are very interested in the Bodega Bay problem and will certainly ask some questions about it. I would appreciate any technical information you could provide so that I may properly prepare myself on the site location and its position relative to the San Andreas fault and other smaller faults in the vicinity. I have also been asked to mention something relative to Stanford's linear accelerator and its relationship to the fault. Any information you could provide would be greatly appreciated.

Very truly yours,

Emil J. Mateker Jr.

Emil J. Mateker
Asst. Prof. of Geophysics
