

JUN - 6 1989

Docket No. 030-21044

License No. 57-23414-01

EA No. 89-100

Government of American Samoa  
Pago Pago, American Samoa

Attention: T. Fuavai  
Director of Public Works

Gentlemen:

SUBJECT: NRC ENFORCEMENT CONFERENCE

This refers to the enforcement conference held with Mr. A. Smith on May 12, 1989. The conference was related to the activities authorized by the NRC license listed above. Subjects discussed during the meeting are described in the report which is enclosed for your information.

Apparently the root causes of the majority of the violations identified during the last inspection were, (1) the lack of proper management overview and control of the licensed program, and (2) the frequent change in management associated with the licensed program.

In order that we may be assured that the licensed program is being managed and controlled by responsible individuals, we request that the Regional Office be notified immediately when a management change is anticipated which could affect the overall radiation safety program.

As a result of the enforcement conference, an early reinspection will be conducted by the regional staff. Any future violations, especially repetitive violations, will be considered for escalated enforcement actions such as civil penalties or modification of the license.

No response to this letter is required. If you have questions concerning this report, please contact Mr. R. D. Thomas at (415) 943-3763.

Sincerely,

*Original Signed*  
Ross A. Scarano, Director  
Division of Radiation Safety and  
Safeguards

Enclosure:
