50-368

Licensee: Arkansas Power & Light Company (AP&L)
P.O. Box 551
Little Rock, Arkansas 72203

Facility Name: Arkansas Nuclear One (ANO), Units 1 and 2

Inspection At: ANO, Russellville, Arkansas

Inspection Conducted: May 1-5, 1989

Inspector: Blaine Munday 6/7/89
for J. A. F. Kelly, Senior Security Inspector Date
Security and Emergency Preparedness Section

Approved: Blaine Munday 6/7/89
for R. J. Everett, Chief, Security and Emergency Date
Preparedness Section

Inspection Summary

Inspection Conducted May 1-5, 1989 (Report 50-313/89-20; 50-368/89-20)

Areas Inspected: Routine, unannounced inspection of the licensee's physical security program. The areas inspected within the physical security program included management support, security program plan, and audits; protected and vital area physical barriers, and detection and assessment aids; compensatory measures; and security training and qualifications.

Results: Within the areas inspected, two violations were identified. (Inadequate assessment aid and inadequate compensatory measures; see paragraph 2.)

The NRC inspection effort focused primarily on the licensee's security program upgrade and revisions to the physical security plan (PSP). Management has made a commitment to install new security hardware systems. Security personnel training is also being upgraded to support these changes. These changes should improve the physical security program.
