Dear Mr. Utley:

Subject: Review of Draft Brunswick Risk-Based Inspection Guide for  
Proprietary Information

The enclosed draft Risk-Based Inspection Guide (RIG) has been produced to assist NRC inspectors in focusing on risk-significant aspects of Brunswick Steam Electric Plant design and operation. Your Brunswick PRA was used in preparing the RIG. Because you have marked your PRA as proprietary information, we have marked the draft RIG as proprietary, pending your review of its content. We do not believe that we have included any information in this RIG that is proprietary in nature, and would like to treat the final version as nonproprietary. Therefore, we request that you review the draft RIG and inform us of any contents that you believe are proprietary.

We would also be pleased to receive any technical comments or suggestions that you care to make on the draft. Our Resident Inspector at Brunswick is receiving a copy for his review, also. Before finalizing the RIG, one of the authors and NRC's Project Engineer intend to meet with the Resident on site to conduct inspection activities and review the draft. They could meet with your staff at that time, if you are interested. Your staff should also feel free to contact our Project Engineer, Steve Long, at any time to discuss the draft or the project. He can be reached at (301) 492-3162.

Thank you for your cooperation in providing the necessary information to produce this RIG and for reviewing the draft.

DFol  
1/0

Mr. E. E. Utley

2

The reporting and/or record keeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P. L. 96-511.

Sincerely,

*151*

Edmond G. Tourigny, Senior Project Manager  
Project Directorate II-1  
Division of Reactor Projects I/II  
Office of Nuclear Reactor Regulation

Enclosure:  
As stated
