Washington, D. C. 20555

Subject: Catawba Nuclear Station, Units 1 and 2  
Docket Nos. 50-413 and 50-414  
License Conditions 16 (Unit 1) and 10 (Unit 2) SGTR  
Technical Specification Amendment  
Steam Generator Tube Rupture Analysis

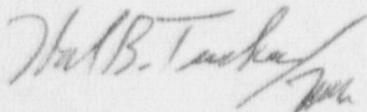

Dear Sir:

This letter contains a revised proposed Technical Specification for Catawba's Steam Generator Power Operated Relief Valves (PORVs). This change supersedes the proposed Technical Specification and Bases in my letter dated August 24, 1988. However, the No Significant Hazards Analysis referenced in my August 24, 1988 letter submitted by letters of December 4, 1987 and December 11, 1987 remains valid. Also, the FSAR analysis submitted with my August 24, 1988 letter remains unchanged.

The changes to the proposed Technical Specification for the PORVs submitted on August 24, 1988 are to reduce the allowed outage times. This will maintain Catawba's Technical Specifications consistent with the industry.

Pursuant to 10 CFR 50.91 (b) (1) the appropriate South Carolina State Official is being provided a copy of this amendment request.

Very truly yours,

Hal B. Tucker

PGL/IV/47
