Dear Mr. Hulbert:

This is to confirm our intent to conduct a survey of your emergency data system capabilities for possible use as part of an Emergency Response Data System (ERDS). As I discussed with you a team of two individuals (Barry Zalzman, NRC and Floyd McManus, COMEX) will be arriving at your Training and Education Center at 9:00 a.m. on August 19, 1986 to conduct the survey. If acceptable we will start with a brief introductory meeting followed by the survey of your available data and computer characteristics. For your information, I am enclosing a list of the individuals we expect we need to speak with and a copy of the ERDS survey checklist to be used during the visit. Please realize that not all items on the checklist will apply to your facility. It deals with a broad spectrum of systems, because it was intended to cover all licensed nuclear reactors. If you have any questions please contact me on (301)492-4155.

Sincerely,

John B. Hickman
Incident Response Branch
