Subject: McGuire Nuclear Station
Docket Nos. 50-369, and 50-370
Supplement to Proposed Amendment for the Auxiliary Building
Filtered Ventilation Exhaust System Technical Specification

Gentlemen:

By letter dated May 11, 1989 we submitted proposed revisions to Technical Specification 3/4.7.7, Auxiliary Building Filtered Ventilation Exhaust. As part of the revision, Technical Specification Figure 5.1-3 was revised. This figure has been reproduced various times due to revisions resulting in a poor drawing. Subsequently, we have re-drawn the figure to improve the quality; however, no other changes have been made to the drawing other than those proposed in our May 11, 1989 submittal. Therefore, we request, as discussed with Mr. D. Hood of ONRR, that the attached figure be used in place of the figure included in our May 11, 1989 proposed revision.

Should there be any questions, please contact S.E. LeRoy at (704) 373-6233.

Very truly yours,

Hal B. Tucker
