Gentlemen:

Please find enclosed an amendment to your NRC Material License.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the Region I Material Licensing Section, (215) 337-5239, so that we can provide appropriate corrections and answers.

Please be advised that you must conduct your program involving licensed radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, please note the items in the enclosed, "Requirements for Materials Licensees."

Based on our June 8, 1988 telephone conversation, we understand that you do not want the name changed in Condition 1 of your license as was described in your March 21, 1988 and May 23, 1988 letters. We further understand that you plan to submit a request to amend the license to change the name in Condition 1. in the near future when the Environmental Health Center is acquired by another company. Please be advised that this request must be signed by a representative of the management of the new company and that the information requested in our April 27, 1988 letter to you must be supplied with the request to amend the license.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, the NRC expects licensees to pay meticulous attention to detail and to achieve the high standard of compliance which the NRC expects of its licensees.
