REF: Renewal of Licence Number 35-07466-05

Dear Mr. Cain:

The following is submitted per our recent telephone conversation of 4/4/88 concerning the above renewal request submitted 2/19/87.

In order to obtain some well-logging sources from ARCO Oil and Gas Co. we added the two specific sources as numbers 16 and 18 in items 5 and 6 of the application. Specifically we requested allowance for a 100 millicurie Cs-137 source, NEEI Model Cs-V and a 5 curie Am-241 Nuclear Sources and Service Model AN-HP (Am-Be) neutron source. These sources are currently in storage at ARCO in Plano Texas and when approved would be transferred and used as stated in the Note to item 6 of our application.

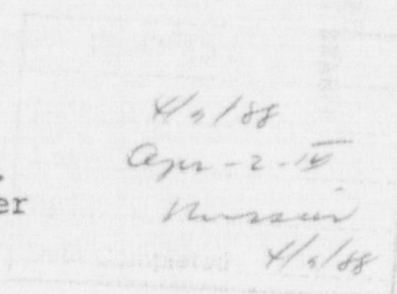

It is my understanding from our conversation that this memo serves as a request for amendment to the above license in order that these sources may be obtained for R&D use while the renewal application is under review by your office.

Thank you for your consideration for this request and should you have any questions concerning this matter please contact me at the above number.

Sincerely,

Paul Skierkowski
