

APR 19 1989

Docket No. 50-440

The Cleveland Electric Illuminating
Company

ATTN: Mr. Alvin Kaplan
Vice President
Nuclear Group

10 Center Road
Perry, OH 44081

Gentlemen:

In a letter dated March 3, 1989, you requested that we review and approve proposed changes to the Unusual Event initiating condition for the Perry Nuclear Power Plant Emergency Plan. We have discussed with NRC Headquarters, the review of these changes along with similar changes proposed by other licensees. We have jointly agreed that this issue should be reviewed generically, rather than on a plant specific basis. Therefore, because of the generic implications of these proposed changes, we have forwarded your request to Headquarters for resolution. The justification that you present in your letter, as well as those in similar requests from other licensees, will be considered during the review. The current effort by NUMARC in the development of Emergency Action Levels will also be considered in resolving this matter.

Sincerely,

L. Robert Greger, Chief
Reactor Programs Branch
