ATTN: Mr. Frederick J. Hebdon  
Project Director, Region IV  
Division of Reactor Projects  
III, IV, V and Special Projects

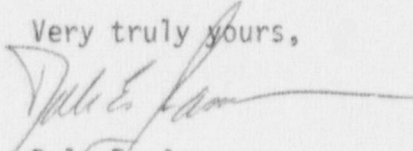

SUBJECT: Arkansas Nuclear One - Unit 2  
Docket No. 50-368  
License No. NPF-6  
Generic Letter No. 89-04

Dear Mr. Hebdon:

Generic Letter No. 89-04, "Guidance on Developing Acceptable Inservice Testing Programs," approved IST program relief requests for licensees who have not received a Safety Evaluation Report (SER) provided that they confirm their conformance with the positions stated in this generic letter. Table 2 of G.L. 89-04 listed those plants with current IST programs reviewed and SER issued, who need not respond.

After consultation with our NRC Project Manager, in a telephone conference on May 25, 1989, he informed us that ANO-2 was inadvertently omitted from Table 2 of G.L. 89-04, since an SER had been issued on June 20, 1985 (2CNA068503) and that a response to the generic letter for ANO-2 was not required. He also indicated that a supplemental SER would be forthcoming as a result of our response to the SER concerning certain safety related pumps and valves.

Very truly yours,

  
Dale E. James  
Supervisor, Licensing
