

April 19, 1989

Docket No. 50-267

Mr. R. O. Williams, Jr.
Senior Vice President, Nuclear Operations
Public Service Company of Colorado
Post Office Box 840
Denver, Colorado 80201-0840

Dear Mr. Williams:

SUBJECT: TRANSMITTAL OF TECHNICAL EVALUATION REPORT FOR TECHNICAL
SPECIFICATION UPGRADE PROGRAM (TSUP) (TAC NO. 56565)

Please find enclosed a copy of the Technical Evaluation Report (TER) concerning the TSUP as completed by our contractor, EG&G Idaho, Inc. This report contains the detailed evaluation of the proof and review copies of the Fort St. Vrain Technical Specification Program as submitted by your letters dated May 27, 1988 and June 14, 1988.

In view of the changes Public Service Company of Colorado has proposed in your letters dated December 5, 1988 and January 20, 1989, the staff decided that the TSUP TER should be released to you. This would serve as an aid in developing a suitable set of defueling Technical Specifications. At this time, the TER should be considered as a working draft. The staff will in general accept the findings of the TER, but still would conduct a review of your proposed defueling Technical Specifications against the proof and review copy submittals.

If there are any questions about this matter, please contact me at (301) 492-1333.

Sincerely,

/s/

Kenneth L. Heitner, Project Manager
Project Directorate - IV
Division of Reactor Projects - III,
IV, V and Special Projects
Office of Nuclear Reactor Regulation
