- Reference: (1) Letter from D. F. Kirsch (NRC) to E. E. Van Brunt, Jr. (ANPP), dated July 24, 1987. NRC Inspection Reports 50-528/87-17, 50-529/87-18, and 50-530/87-19
- (2) Response to Notice of Deviation: 50-530/87-19-01, 102-00471-EEVB/TDS dated August 21, 1987

Dear Sirs:

Subject: Palo Verde Nuclear Generating Station (PVNGS)
Unit 3
Docket No. STN 50-530 (License No. NPF-74)
Supplement to Notice of Deviation: 50-530/87-19-01
File: 88-070-026

This letter is provided to correct a typographical error made in reference (2), on page 8, which states: "A preventive maintenance task has been initiated which will test and verify continued operability of this system on a biannual basis." The word "biannual" should have been "biennial" (every two years).

To verify whether the error in the original statement was typographical, an Engineering Evaluation was performed. The results of the evaluation support the performance of calibration every two years (biennial).

If you have any questions, please contact Mr. Timothy Shriver of my staff at (602) 393-2521.

Very truly yours,

Donald B. Karner
Executive Vice President
Project Director
