Emile Julian
To Whom It May Concern: RE: PR50.72.170 on 54 FR 193-79

The proposed rule change cited above is abominable and I strongly urge you to reject the proposal. Nuclear waste must be dealt with immediately but not in this manner. You should be ceasing the production of waste until safe and permanent solutions can be found. Please record this as part of the permanent record.

Yours truly,

Kate O'Brien
