Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP) Report Number
50-353/87-99

This refers to the Systematic Assessment of Licensee Performance (SALP) of the Limerick Generating Station Unit 2 for the period of August 1987 to December 1988, initially forwarded to you by our March 15, 1989 letter (Enclosure 1). This SALP evaluation was discussed with you and your staff at a meeting held on March 30, 1989 (see Enclosure 2 for attendees). We have determined that no changes are necessary to the SALP report which is being transmitted as the final report (Enclosure 3).

Our overall assessment was that you and your staff have continued to maintain very good controls over the construction activities and have effectively addressed weaknesses identified in the previous SALP report. In addition, your efforts to prepare for startup including verification of construction and design activities, and preoperational testing have been comprehensive and well managed.

We appreciate your cooperation.

Sincerely,

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP)
Report Number 50-353/87-99

On February 22, 1989 the NRC Region I SALP Board reviewed and evaluated the performance of activities associated with the Limerick Generating Station Unit 2 for the period from August 1987 to December 1988. This assessment is documented in the enclosed SALP Board Report. We will contact you to schedule a meeting to discuss the SALP evaluation.

This assessment has covered the completion of final construction activities and the transition to the conduct of preoperational testing. We envision that this will be the last SALP that will address Unit 2 separately from Unit 1.

At the SALP management meeting, please be prepared to discuss your evaluation of our assessment. Additionally, we solicit your written comments within 30 days after the meeting.

We appreciate your cooperation. Should you have any questions concerning the SALP report, we would be pleased to discuss them with you.

Sincerely,
