Mr. Richard J. K. Stratford
 Deputy Assistant Secretary
 for Nuclear Energy and Energy Technology
 Bureau of Oceans and International Environmental
 and Scientific Affairs
 U.S. Department of State
 Washington, D.C. 20520

APR 18 1989

Dear Mr. Stratford:

The U.S. Nuclear Regulatory Commission (NRC) has had under consideration a proposal from Cameco (formerly Eldorado Resources Limited) to import into this country wastes resulting from the production of uranium hexafluoride.

This is to inform you that the NRC has sent a letter to Cameco indicating that the NRC does not object to Cameco's proposal to import and dispose of its waste (containing an unimportant quantity of source material) in a U.S. Environmental Protection Agency (EPA) or State permitted hazardous waste facility (Enclosure). You should note that NRC has recommended that Cameco contact your agency, as well as the EPA, to assure that you have no objection to the proposal.

The NRC is informing the EPA and the States of New York and Michigan of the attached NRC response to Cameco. If you should have any questions on this matter, please do not hesitate to contact me.

Sincerely, (Original Signed by _____)

John T. Greeves, Acting Director
 Division of Low-Level Waste Management
 and Decommissioning
 Office of Nuclear Material Safety
 and Safeguards
