Attn: Materials, Section B

Dear Sir/Madam:

Enclosed you will find our completed NRC Form 314, along with the attached results of our close out survey, performed by Bolton and Galanek, Inc. (our consultants) on March 23, 1987. Dynatech wishes to terminate our NRC Radioactive Materials License, No. 20-15174-01, due to anticipated changes in the technical nature of our business which is contract research and development. We foresee no need for use of radioactive materials in the future.

I would like to thank the NRC staff for their practical suggestions and assistance in helping us sustain a safe and effective radiation protection program over the duration of our license.

If there is any more information needed to process our license termination request, please contact me at (617) 868-8050, extension 243.

Sincerely,

Stephen C. Crooker
Radiation Safety Officer
