MEMORANDUM FOR: James Lieberman, Director and Chief Counsel  
Regional Operations and Enforcement  
Office of the Executive Legal Director

FROM: Sharon R. Connelly, Director Original signed by  
Office of Inspector and Auditor Sharon R. Connelly

SUBJECT: 10 CFR 2.206 PETITION REGARDING WOLF CREEK

Reference is made to your May 30, 1985, memorandum to me concerning the subject 10 CFR 2.206 Petition filed by the Government Accountability Project (GAP).

We have reviewed the May 15, 1985, cover letter which transmitted the Petition to the U.S. Nuclear Regulatory Commission (NRC), and the Petition. Portions of the cover letter and the Petition elude to inadequate performance on the part of NRC staff. However, none of the four items identified by GAP in the cover letter, which requests action on the part of the Commission, require action by the Office of Inspector and Auditor (OIA) at this time. Rather, GAP has requested the Commission to require an explanation from both the Office of Nuclear Reactor Regulation and Region IV regarding their alleged failure to address certain allegations concerning Wolf Creek Nuclear Station.

Based on our review of the Petition and cover letter, we plan no further action in this matter and consider this inquiry closed. If the Commission wishes to pursue this matter further after reviewing the NRC staff responses to the allegations, OIA will reopen this inquiry.
