Vice President, Nuclear Operations
P.O. Box 840
Denver, Colorado 80201-0840

Gentlemen:

SUBJECT: EXAMINATION REPORT, FORT ST. VRAIN (FSV)

During the week of July 10, 1989, NRC administered four Limited Senior Reactor Operator examinations to employees of your company who had applied for licenses to supervise fuel manipulation at your FSV facility. Prior to written examination administration, two members of your training staff signed security agreements and prereviewed the examination that was to be given. At the conclusion of the written examination, the written examination and answer key were provided to your refueling operator training staff for review and comment. At the conclusion of the site visit, a brief exit meeting was held with a plant staff representative to inform him of problems noted during the onsite examination process. Three of the Limited Senior Reactor Operator candidates passed the examinations, and the appropriate license has been issued to each.

Should you have any questions concerning this letter, please contact us.

Sincerely,

Original Signed By:
Thomas P. Gwynn

James L. Milhoan, Director
Division of Reactor Projects
