Inspection Summary

Inspection Conducted July 10-14, 1989 (Report 50-445/89-56)

Areas Inspected: Routine, announced, preoperational inspection of the applicant's physical security program. The areas inspected within the physical security program included protected area (PA) physical barriers, vital area (VA) physical barriers, communications, testing and maintenance, and security system power supply.

Results: Within the areas inspected, no violations or deviations were identified. The inspector observed that adequate progress was being made in all areas of the applicant's security implementation program. The applicant's security implementation schedule requires soft lockdown on August 3, 1989, and hard lockdown on September 2, 1989. The applicant committed to perform material and vehicular searches commencing July 31, 1989, to provide an inspection window for NRC prior to the hard lockdown on August 3, 1989.

Inspection Conducted July 10-14, 1989 (Report 50-446/89-56)

Areas Inspected: No inspection of Unit 2 was conducted.

Results: Not applicable.
