Dr. Thomas E. Murley, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Units 1 and 2
Static "O" Ring Reportability
NRC Docket Nos. 50-373 and 50-374

References (a): W.E. Morgan letter to U.S. NRC dated
February 6, 1989, Requesting Relief from
Static "O" Ring Reportability.

(b): P.C. Shemanski letter to T.J. Kovach dated
June 20, 1989, transmitting Approval of
Static "O" Ring Reportability Request.

Dear Dr. Murley:

Reference (a) requested relief from the Notification and Reporting requirements of IE Bulletin 86-02 regarding Static "O" Ring Differential Pressure Switches. Reference (b) granted approval of this request and additionally required LaSalle County Station to report SOR dp switch failures within 30 days of discovery. In addition, LaSalle County Station was to provide the NRC with a SOR dp switch summary report on a quarterly basis.

Per a telephone conversation with Mr. Paul Shemanski of your staff on June 23, 1989, it was decided that the 30 day report was not required and that LaSalle County Station would only have to provide the NRC with a SOR dp switch summary report on a quarterly basis.

This letter documents that conversation.

If you have any further questions regarding this matter, please contact this office.

Very truly yours,

W. E. Morgan
Nuclear Licensing Administrator
