Results: The licensee was found to be in compliance with NRC requirements within the areas examined, except as noted below:

Physical Security Program for Power Reactors - Protected and Vital Area Physical Barriers, Detection and Assessment Aids: The licensee's perimeter intrusion detection system was able to be circumvented in certain areas.

Additionally, three previously identified items (50-255/88024-01, 88024-02 and 88024-03) were reviewed and will remain open pending completion of corrective actions.

Licensee management attention to and involvement in security activities is good. The licensee's performance generally meets regulatory requirements.
