Control No. 1077789

Attention: Jack Davis, N. M.S. Sec. B

Dear Mr. Davis,

As per our conversation March 18, 1988, we have decided to store only the isotope in our fire proof vault. No radiography will be performed on the premises.

Enclosed are three (3) sketches of the floor plan of our facility. The fire proof vault is made of 8" concrete block 8'x12' size. The ceiling is poured concrete, the door is made of steel with an alarm system inside. The safe inside the vault is 200-lb. one hour fire proof safe cemented in. The radiation level on contact at surface of safe is 1 MR. Outside the vault there is no radiation reading.

See sketch 1 of 4 showing our location of vault.

Sincerely,

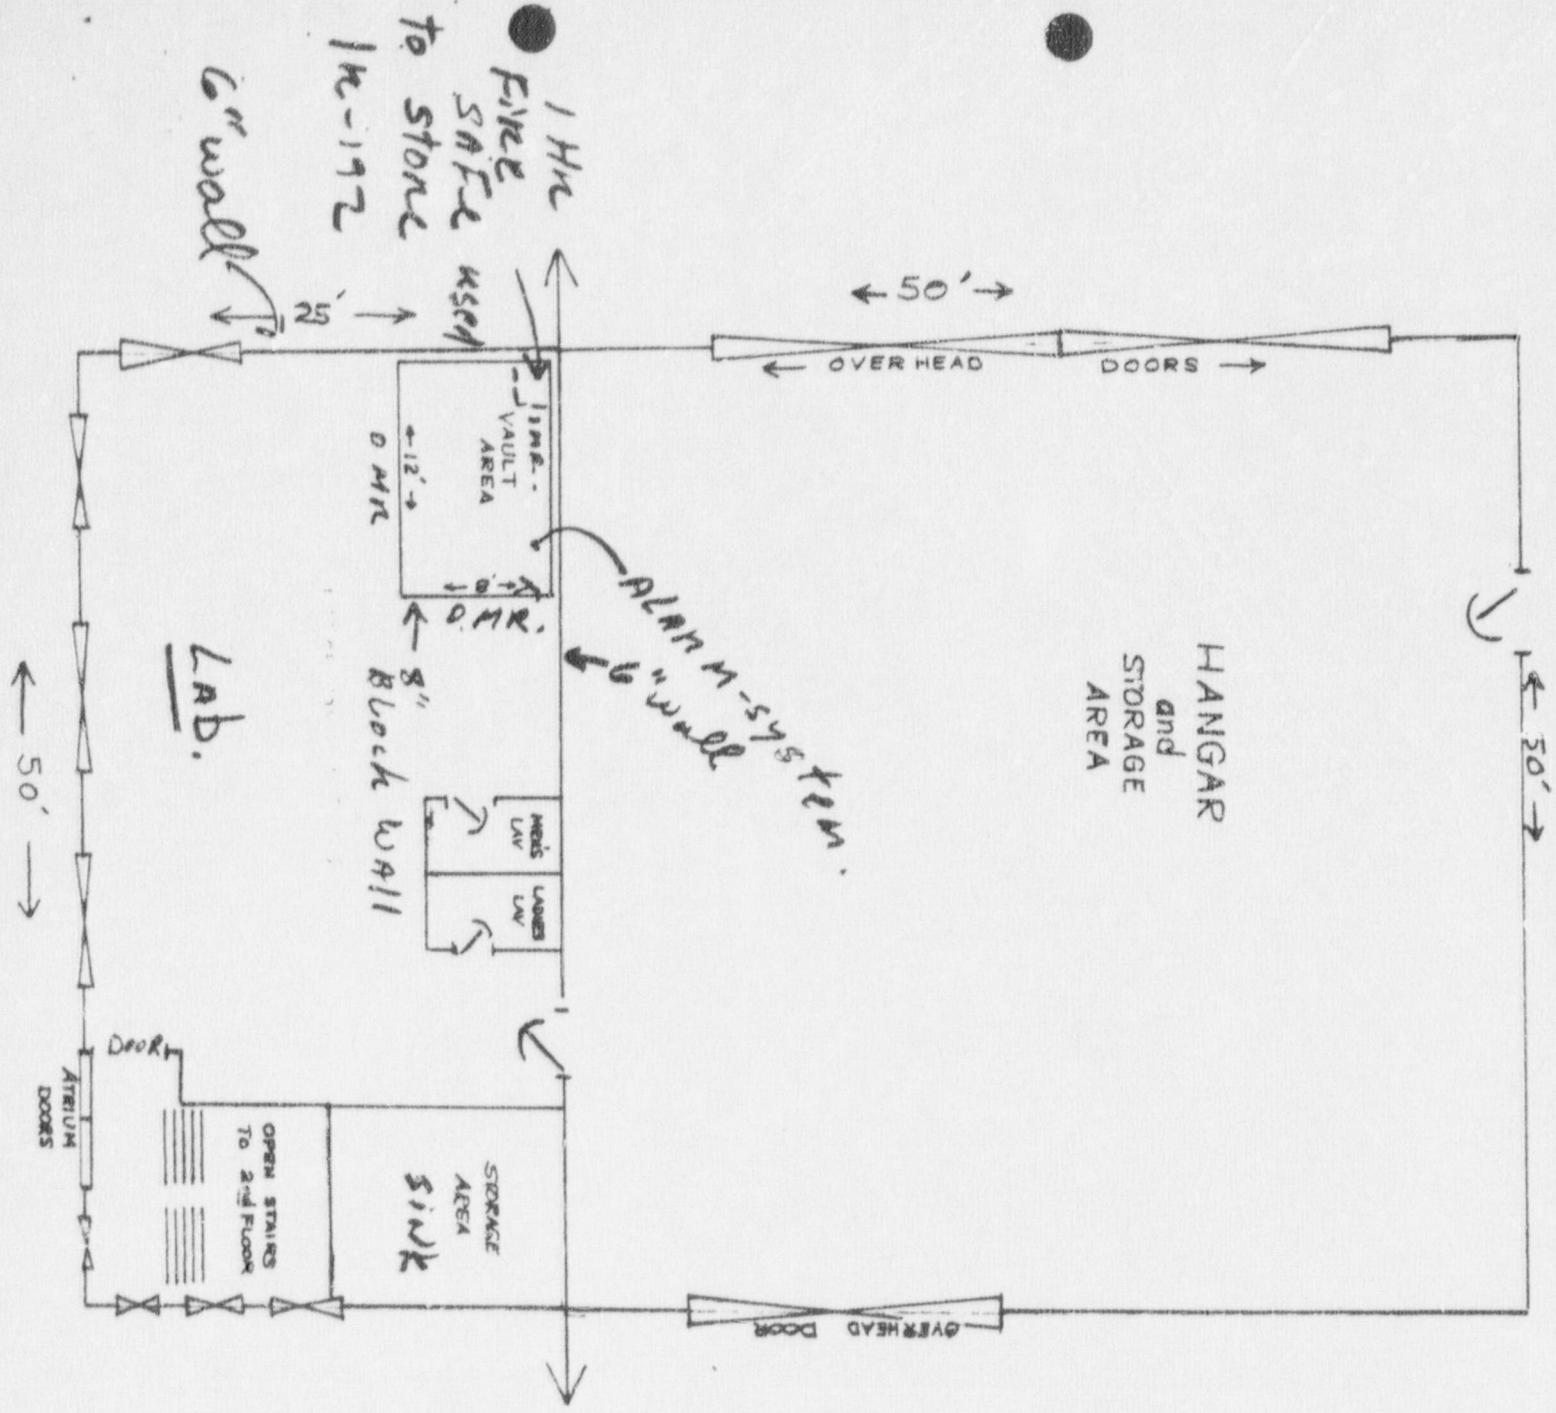

Michael Kozak
President
