Docket. 50-382/89-15

Louisiana Power & Light Company
ATTN: J. G. Dewease, Senior Vice President
Nuclear Operations
317 Baronne Street
New Orleans, Louisiana 70160

Gentlemen:

This refers to the inspection conducted by Mr. J. R. Boardman of this office during the periods June 5-9 and June 20-21, 1989, of activities authorized by NRC Operating License NPF-38 for the Waterford Steam Electric Station, Unit 3, and to the discussion of our findings with Mr. R. P. Barkhurst and other members of your staff on June 9 and at the conclusion of the inspection.

Areas examined during the inspection included the licensee's programs for the installation of electrical splices using heat-shrinkable tubing, control of emergency diesel generator fuel oil during storage, and information relating to the containment building temperature profile. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspector. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

alg/5/

Thomas Dwyer

James L. Milhoan, Director
Division of Reactor Projects
