OCT 22 1987

Cargill Fructose, Inc.
ATTN: Mr. M. Cronl
Post Office Box 1400A
5600 Brent Linger Drive
Dayton, OH 45414

License No. 34-17221-01
Expiration Date: September 30, 1987

Gentlemen:

SUBJECT: NOTICE OF VIOLATION

NRC records show that the Byproduct Material License identified above expired on September 30, 1987, and that no renewal application was filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with you on October 16, 1987, we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30. If you continue to willfully use and/or possess radioactive material without a valid NRC license, this is the basis for NRC to take escalated enforcement actions, which may include a civil penalty and/or criminal actions.

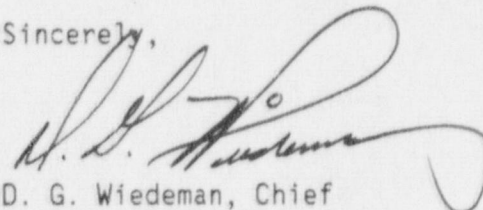

IF YOU WANT TO CONTINUE YOUR PROGRAM, YOU MUST IMMEDIATELY SUBMIT THE FORM NRC 313, "Application for Byproduct Materials License" to the Regional Licensing Section, U.S. Nuclear Regulatory Commission, 799 Roosevelt Road, Glen Ellyn, Illinois 60137, Attention: D. J. Sreniawski.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170. If so, submit the appropriate fee along with the application.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license. No other use of the material on hand or purchase of additional byproduct material is authorized.

If you have any questions, please contact Rose Pankratz at (312) 790-5735.

Sincerely,

D. G. Wiedeman, Chief
Nuclear Materials Safety
