MEMORANDUM FOR: Atomic Safety and Licensing Board  
and All Parties

FROM: John E. Glenn, Chief  
Medical, Academic, and Commercial  
Use Safety Branch  
Division of Industrial and  
Medical Nuclear Safety, NMSS

SUBJECT: NEW INFORMATION POTENTIALLY RELEVANT AND MATERIAL TO BOARD  
PROCEEDING IN THE MATTER OF SAFETY LIGHT CORPORATION, UNITED  
STATES RADIUM CORPORATION, USR INDUSTRIES, INC., USR LIGHTING,  
INC., USR CHEMICAL, INC., USR METALS, INC., USR NATURAL  
RESOURCES, INC., LIME RIDGE INDUSTRIES, INC., METREAL, INC.,  
AND ALL OTHER SUCCESSOR CORPORATIONS TO EITHER USR INDUSTRIES,  
INC. OR U. S. RADIUM CORP.

In conformance with the Commission's policy on notification of Licensing Boards, Appeal Boards, or the Commission of new, relevant, and material information, this memorandum calls attention to an Order Modifying Licenses (Effective Immediately) that was issued on August 21, 1989, a copy of which is enclosed. This Order requires Safety Light Corporation, USR Industries, Inc., U. S. Radium Corporation and their successors and subsidiaries (the Corporations) to establish a trust in accordance with the terms of the August 21st Order to assure that funds are promptly set aside for implementation of a site characterization plan of Safety Light's Bloomsburg facility and for taking necessary immediate remedial actions for any significant health and safety problems that might be identified during site characterization. The Order was issued because of the limited financial resources available to the Corporations to ensure that they characterize

Gentlemen:

Subject: ORDER MODIFYING LICENSES (EFFECTIVE IMMEDIATELY)

Enclosed is an Order Modifying Licenses (Effective Immediately) requiring you to establish funding for implementation of a site characterization plan of the Bloomsburg facility and for taking necessary immediate remedial actions for any significant health and safety problems that might be identified during site characterization. This Order has been issued to assure that funds are promptly set aside for these purposes. The NRC believes it necessary to issue this Order in light of the limited financial resources available to Safety Light Corporation, U.S. Radium Corporation, USR Industries, Inc., and their successor corporations and subsidiaries to ensure that the Corporations characterize the type and extent of radioactive contamination of the Bloomsburg site and take necessary remedial actions. This Order is one part of the NRC actions deemed necessary to ensure a timely and orderly decontamination of the site. Willful failure to comply with the terms of the Order may result in further civil action or referral to the Department of Justice for possible criminal prosecution.

In accordance with Section 2.790 of the NRC's Rules of Practice, Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed Order will be placed in the NRC's Public Document Room.

Gentlemen:

Subject: ORDER MODIFYING LICENSES (EFFECTIVE IMMEDIATELY)

Enclosed is an Order Modifying Licenses (Effective Immediately) requiring you to establish funding for implementation of a site characterization plan of the Bloomsburg facility and for taking necessary immediate remedial actions for any significant health and safety problems that might be identified during site characterization. This Order has been issued to assure that funds are promptly set aside for these purposes. The NRC believes it necessary to issue this Order in light of the apparently weak financial condition of Safety Light Corporation, U.S. Radium Corporation, USR Industries, Inc., and their successor corporations and subsidiaries to ensure that the Corporations characterize the type and extent of radioactive contamination of the Bloomsburg site and take necessary remedial actions. This Order is one part of the NRC actions deemed necessary to ensure a timely and orderly decontamination of the site. Willful failure to comply with the terms of the Order may result in further civil action or referral to the Department of Justice for possible criminal prosecution.

In accordance with Section 2.790 of the NRC's Rules of Practice, Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosed Order will be placed in the NRC's Public Document Room.

ORDER MODIFYING LICENSES (EFFECTIVE IMMEDIATELY)

I

Safety Light Corporation (Safety Light) is the named licensee on Byproduct Material License Nos. 37-00030-02, 37-00030-08, 37-00030-07E, 37-00030-09G, and 37-00030-10G, issued by the Nuclear Regulatory Commission (NRC).

License No. 37-00030-02 authorizes the possession, storage, and use of any byproduct material for purposes of decontamination, cleanup, and disposal of equipment and facilities previously used for manufacturing, research and development in operations performed at the facility located at 4150-A Old Berwick Rd., Bloomsburg, PA (the Bloomsburg facility). License No. 37-00030-02 was originally issued on June 20, 1956 and was last renewed on January 25, 1979. This license has been under timely renewal since February 29, 1984.

~~8408230326~~

13 pp.

License No. 37-00030-08 authorizes the licensee to conduct research and development and to manufacture various devices containing tritium. License No. 37-00030-08 was originally issued on August 5, 1969, and was last renewed on January 6, 1983. This license has been under timely renewal since December 31, 1987. The above licenses permit use of material only at facilities at 4150-A Old Berwick Road, Bloomsburg, Pennsylvania.

License No. 37-00030-07E authorizes the distribution of timepieces, hands and dials to which luminous paint containing tritium has been applied, to persons exempt from NRC licensing pursuant to 10 C.F.R. § 30.15. License No. 37-00030-07E was originally issued on April 16, 1965 and was last renewed on May 27, 1986. This license expires on April 30, 1991.

License No. 37-00030-09G authorizes the distribution of luminous devices containing tritium to persons generally licensed pursuant to 10 C.F.R. § 31.5. License No. 37-00030-09G was originally issued on January 13, 1966 and was last renewed on October 24, 1983. This license has been under timely renewal since October 31, 1988.

License No. 37-00030-10G authorizes the distribution of sealed self-luminous sources to persons generally licensed pursuant to 10 C.F.R. § 31.7. License No. 37-00030-10G was originally issued on December 13, 1971 and was last renewed on April 22, 1985. This license expires on April 30, 1990.

II

The buildings, soil and groundwater at the Bloomsburg facility, collectively hereafter referred to as the Bloomsburg facility or facility, have become radioactively contaminated as a result of past operations at the facility. The known principal radionuclides contaminating the facility are tritium, strontium-90 (Sr-90), cesium-137 and radium-226. The levels of radioactivity exceed those that would permit unrestricted access to the facility. Tritium has also been detected in groundwater off-site in the well of a nearby house. Although the tritium in that well is not yet above drinking water limits set by the U.S. Environmental Protection Agency, further off-site contamination is likely to occur over time due to the movement of groundwater and soil erosion. Pits at the facility contain unknown types and quantities of radioactive material that pose a potential threat to the health and safety of employees and others at the facility.

III

To ensure that the Corporations would characterize the type and extent of radioactive contamination at the Bloomsburg facility, and plan and implement an orderly and timely decontamination of the facility, an Order Modifying Licenses (Effective Immediately) and Demand for Information was issued by the NRC on March 16, 1989 to the Corporations. This Order required the preparation of plans for site characterization and decontamination and specified, as part of the required site characterization plan, that "the plan shall specify the amount of funds that each of the Corporations is to provide for implementation of the plan" (Section VII.B of the Order).

In two letters dated April 17, 1989, the Corporations filed answers to the March 16, 1989 Order. On June 2, 1989, after receiving an extension of time to comply with the requirement of the Order to submit a characterization plan for the site, the Corporations submitted a Joint Characterization Plan (JCP) prepared by IT Corporation for providing a radiological assessment of the Bloomsburg facility. The NRC reviewed the plan and found that it did not satisfy the terms of the Order in a number of significant respects, which were described in a letter from the NRC to the Corporations dated June 16, 1989. The NRC informed the Corporations that they were in apparent violation of the Order, and described the actions that might follow as a result of this failure to comply with the terms of the Order. Among the many apparent violations of the Order, the NRC noted in its June 16, 1989 letter that the Corporations had failed to specify funding as required by Section VII.B of the Order.

The other apparent violations of the Order included: (1) the failure to describe a complete radiological and geohydrological survey of all facilities and of the surrounding surface and subsurface soil and groundwater to determine radionuclide concentrations and their lateral and depth profiles, as well as their movement in the groundwater; (2) the failure to provide for the characterization of the source of tritium contamination and for the radioactive source term, and for assessment of contaminant transport in the groundwater; (3) the failure to address the assessment of the extent to which lagoons and drainage canals are actively releasing contaminants to the environment; (4) the failure to address the characteristics of the sources of radiological contamination which may exist off-site, in general, or on the adjacent property, in particular; (5) the failure to address the assessment of the extent and rate of the off-site transport of contaminated groundwater; and (6) the failure to describe the actions that will

be taken to determine whether Sr-90 and other radioactive nuclides besides tritium have also been transported off-site in groundwater.

Subsequently, the NRC held an Enforcement Conference with the Corporations on July 6, 1989. At that conference, the NRC informed the Corporations that the JCP failed to comply with the requirements of the March 16, 1989 Order. With respect to the financial aspects of the JCP, the Corporations made it clear that the JCP submitted on June 2, 1989, was intended to determine if there are any immediate health effects and reflected the Corporations' limited financial capability. The Corporations indicated that implementation of the June 2, 1989 JCP was estimated to cost \$116,000 and that implementation of the characterization plan required by the Order would cost about \$1,000,000. The Corporations reiterated their limited financial condition in a letter to the NRC dated July 14, 1989 and stated that approximately \$115,000 was the total amount of funds available for site characterization. The NRC has independently estimated the cost of implementation of the site characterization plan which meets the requirements of the March 16, 1989 Order and has determined that \$1,000,000 (plus or minus 30%) is a reasonable estimate. Based upon information provided to the NRC by the Corporations, it appears that the net income of Safety Light Corporation is approximately \$200,000 per year and USR Industries is presently running a deficit. Assets of USR Industries appear to be approximately \$5,000,000, some of which may be encumbered. The President of USR Industries indicated a willingness to sell an interest in a building in Houston, Texas, to raise funds to accomplish the JCP proposed by the Corporations.

By letter dated August 10, 1989, the Corporations submitted a site characterization plan prepared by IT Corporation. The August 10th plan was stated to meet the

intent of NRC's Order of March 16, 1989. While this plan described certain planning, implementation, reporting, scheduling, and quality assurance activities, the plan failed to provide any indications related to the funding to implement the plan, as required by the March 16, 1989 Order and as indicated previously in the NRC's letter dated June 16, 1989. By letter dated August 17, 1989, Safety Light Corporation certified that it committed to jointly fund the plan with USR Industries, et. al. up to a total of \$115,000, of which Safety Light will fund fifty percent, with the balance required for implementation of the plan being sought from their insurance carriers. By certification dated August 18, 1989, USR Industries, Inc. and its wholly owned subsidiaries certified that they intend to fund the plan up to 50 percent of projected total cost of \$115,000 and to the extent practicable seek the balance of funds from their respective insurance carriers. These certifications are inadequate to provide assurance that the required site characterization plan, which is estimated to cost approximately \$1,000,000 will be funded. The continued failure to assure adequate funding to complete implementation of a site characterization plan which satisfies the March 16th Order is a significant concern to the NRC. The NRC's assessment of the technical adequacy of the plan will be described in future correspondence.

#### IV

The Corporations' failure to provide assurance of adequate funding to complete implementation of a satisfactory site characterization plan, the uncertainty regarding the nature and extent of contamination at the Bloomsburg facility, and the statements made by the Corporations' principal officers as to the limited financial resources available for site characterization, let alone decontamination, demonstrate that additional actions are immediately needed to

protect public health and safety by assuring that sufficient resources are made available by the Corporations to initiate and complete the site characterization and take necessary immediate remedial action for any significant health and safety problems. Based on the above, I have determined, pursuant to 10 C.F.R. § 2.204, that the public health, safety, and interest require that this Order be made immediately effective.

V

In view of the foregoing, and pursuant to Sections 81, 161b, 161c, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 C.F.R. § 2.204 and 10 C.F.R. Parts 30 and 32, IT IS HEREBY ORDERED, EFFECTIVE IMMEDIATELY, THAT LICENSE NOS. 37-00030-02, -08, -07E, -09G, and -10G ARE MODIFIED AS FOLLOWS:

- A. The Corporations shall establish a trust pursuant to a trust agreement as specified below and, within 30 days of the date of this Order, shall submit an originally signed duplicate of the trust agreement to the Regional Administrator, NRC Region I (hereafter referred to as Regional Administrator);
- B. The trustee must be an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a Federal or State agency;
- C. The Corporations:
  - 1. Shall make payments into the trust fund on or before the dates specified in the following schedule:

<u>Date:</u>	<u>Deposit Required</u>
October 2, 1989	\$ 50,000
November 1, 1989	50,000
December 1, 1989	50,000
January 2, 1990	50,000
February 1, 1990	100,000
March 1, 1990	100,000
April 2, 1990	100,000
May 1, 1990	100,000
June 1, 1990	100,000
July 2, 1990	100,000
August 1, 1990	100,000
September 4, 1990	100,000
	<u>\$1,000,000</u>

The Corporations shall be jointly and severally responsible for satisfying this payment schedule;

2. Shall, within 7 days of a payment scheduled under Section V.C.1 above, certify to the Regional Administrator, under oath or affirmation, that the payment has been made as required;
3. May accelerate payments into the trust fund or may deposit the full amount specified above at the time the fund is established. However, they must maintain the value of the fund at no less than the value that the fund would have if the payments were made as specified above;
4. Will be deemed to be without the required financial assurance or liability coverage in the event of bankruptcy of the trustee, or a suspension or revocation of the authority of the trustee institution to act as trustee, and must establish a new trust that meets the requirements given below within 60 days after such an event.

D. The trust agreement shall provide that:

1. The Corporations shall be the Grantors of the trust;
2. The Grantors shall establish the trust to provide assurance that funds will be available to implement an NRC-approved plan to characterize the type and extent of the radioactive contamination at the Bloomsburg facility and to take immediate remedial action at any time such action is necessary;
3. The Grantors shall designate an identified individual, who is a responsible corporate officer, as the Grantors' authorized representative, and two alternates;
4. The Grantors or the Grantors' authorized representative shall, with written approval from the Regional Administrator, select a contractor to implement the site characterization plan, which contractor will be the beneficiary of the trust, and which may be replaced by the Grantors on reasonable notice, with written approval from the Regional Administrator;
5. The Grantors or the Grantors' authorized representative shall have the option of selecting one or more additional contractors to plan or implement remedial action at the facility, or both, with written approval from the Regional Administrator, which contractors would be additional beneficiaries of the trust, and which may be replaced by the Grantors on reasonable notice, with written approval from the Regional Administrator;

6. The Trustee shall make disbursements from the trust fund to the beneficiary or beneficiaries as the Grantors or the Grantors' authorized representative shall direct in writing, with written approval of the Regional Administrator for disbursements exceeding \$5,000, or as the Regional Administrator shall direct in writing;
7. The Grantors' payments of principal into the trust fund shall consist of cash, but may also consist of short-term obligations of the United States government or other property as the Regional Administrator shall approve in writing;
8. The Trustee shall invest and reinvest the principal and income of the trust fund, including interest earned, and keep the trust fund invested, without distinction between principal and income, in accordance with the following provisions: the Trustee shall hold the trust fund in demand deposits that earn interest and are insured by an agency of the United States government or in short-term obligations of the United States government, provided, however, that the Trustee may hold cash awaiting investment or distribution for a reasonable time (approximately five working days) without liability for the payment of interest;
9. The Trustee shall: (1) within seven days after the end of each month beginning with October 1989, provide to the Regional Administrator a summary of the disbursements made during the past month to include: the date of disbursement, amount of disbursement, party receiving disbursement, and purpose of or activity accomplished by disbursement; and (2) within seven days after the end of each quarter beginning

October 2, 1989, furnish to the Regional Administrator a summary accounting statement of the trust fund for the past quarter, to include: amounts paid into the trust fund, disbursements from the trust fund, interest earned, and the current value of the trust fund;

10. The Trustee may resign, or the Grantors may replace the Trustee, but such resignation or replacement shall not be effective until (1) the Grantors notify the Regional Administrator in writing that the Grantors have appointed a successor trustee and that the successor trustee has accepted the appointment; (2) the Regional Administrator approves the appointment; and (3) the successor trustee assumes administration of the trust;
11. The Trustee shall implement orders, requests, and instructions only if they are in writing and signed by either the Grantors or the Grantors' authorized representative, with a copy to the Regional Administrator, or if they are in writing and signed by the Regional Administrator;
12. The Trustee shall notify the Grantors and the Regional Administrator, by certified mail, within seven days following the expiration of the seven day period after each month following the establishment of the Trust, if no payment is received from the Grantors during that period;
13. The trust agreement may be amended by an instrument in writing executed by the Grantors and the Trustee, with the written approval of the Regional Administrator, or by the Trustee and the Regional Administrator if the Grantors cease to exist;

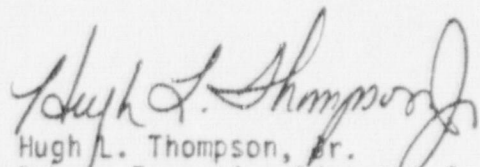

14. The Trust shall be irrevocable and shall continue until terminated at the written agreement of the Grantors, the Trustee and the Regional Administrator, or by the Trustee and the Regional Administrator if the Grantors cease to exist;
  15. Wherever the trust agreement refers to the Regional Administrator, it shall also be deemed to refer to the Regional Administrator's designee or the NRC Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support or his designee.
- E. Should the Corporations' total payments into the trust fund (\$1,000,000) be insufficient to fund implementation of the site characterization plan or to take necessary immediate remedial action and the trust fund be exhausted, the Regional Administrator may, at his discretion, and in writing, require the Grantors to make additional payments totalling no more than \$300,000 into the trust fund.

The Regional Administrator or the Deputy Executive Director for Nuclear Materials Safety, Safeguards, and Operations Support, may, in writing, relax, rescind, or modify any provision of this Order upon the showing by the Corporations, in writing, of good cause. This authority includes, but is not limited to, the authority to extend deadlines and to permit the establishment of separate trust funds with good cause shown, so long as the Corporations otherwise satisfy the requirements of this Order.

## VI

The Corporations or any person adversely affected by this Order may request a hearing within 20 days of the date of its issuance. Any answer to this Order or request for a hearing shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Assistant General Counsel for Hearings and Enforcement, Office of the General Counsel, at the same address, and to the Regional Administrator, NRC Region 1, 475 Allendale Road, King of Prussia, Pennsylvania 19406. If a hearing is requested by the Corporations, the Commission will issue an Order designating the time and place of hearing. If a hearing is held, the issue to be considered at the hearing shall be whether this Order should be sustained. If a person other than the Corporations requests a hearing, that person shall set forth with particularity the manner in which the petitioner's interest is adversely affected by this Order and should address the criteria set forth in 10 C.F.R. § 2.714(d). AN ANSWER TO THIS ORDER OR REQUEST FOR HEARING SHALL NOT STAY THE IMMEDIATE EFFECTIVENESS OF THIS ORDER. Upon the failure of the Corporations herein named to answer or request a hearing within the time specified, this Order shall be final without further proceedings.
