Attn: Glenda Jackson
License Fee Management Branch
Division of Accounting and Finance
Office of Administration and Resources Management

Dear Glenda:

This refers to your letter dated November 3, 1987, indicating the procedures we should take to obtain a valid N.R.C. license.

I am submitting a new application, Form 313, and a check in the amount of \$230.00 as is in accordance with the 10 CFR 170 fee category 3P of subsection 170.31.

This morning I spoke with Mr. Jake Whitton on the Licensing Division of the N.R.C. He requested that I outline the events leading to the transfer of ownership of four (4) Troxler nuclear moisture-density gauges to our firm as follows:

Cooper Engineers, Inc., a California based corporation, owned and operated Troxler nuclear moisture-density gauges in the State of Wyoming, in the city of Gillette under License No. 49-17315-02. In July of 1985, the Gillette office was sold in its entirety to Mr. Richard L. Terrell who operated under the name Cooper Engineers and Materials Testing (CE & MT). It is my understanding that no amendment was made to the existing license nor was an application for a new license submitted. In January 1987, the business was again sold and operated under the name, Civil Engineers and Materials Testing (CE & MT). Again, to my knowledge, no action was made regarding the license. My partner and I purchased the firm in August 1987, under the name Consolidated Engineers and Materials Testing (CE & MT). In August 1987, I applied to

to the N.R.C. to amend or transfer the License No. 49-17315-02 to our firm. Mr. Whitton also requested that I apply for a new license.

All of the gauges are currently locked in a restricted room approved for storage by the N.R.C. under License No. 49-17315-02. The gauges will not be used until a valid license is obtained by our firm. We request that this application be processed immediately. The use of the gauges is vital to the survival of our business.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Tanya R. King', with a stylized flourish at the end.

Tanya R. King
