Peer Review Committee for NUREG-1150

Dear Member:

As promised, attached is a copy of the National Academy of Sciences report "Probabilistic Seismic Hazard Analysis" which the Committee requested at the June meeting. I have been informed that the other report requested by the Committee, i.e., the CSNI expert's report on depressurization, will not be available until late fall. We will provide this to you as soon as it becomes available.

In addition, you recently received a note from Dr. Weeks, BNL, regarding your individual request for reference material. This procedure will allow us to consolidate all such reports and hopefully speed up our response to you.

Again, if I can be of any assistance to you, please let me know.

Sincerely,

15/
