RE: Tritium NightSights
License No. 31-15819-01E
Amendment No. 02

Gentlemen:

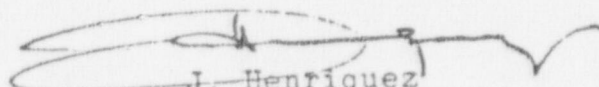

We respectfully request a copy of Gunsight Licenses issued to Magnum Research, Inc. on or about November 1984. The reason for our request is based on the enclosed document which intimates that Magnum Research, Inc. has indeed an NRC license which allows for tritium powered night sights to be distributed unmounted. Whereas our license specifically limits distribution to gunsights mounted on handguns.

This limitation has severely hampered our ability to penetrate several key markets and if indeed the article in question is accurate, SPL would immediately request an amendment to its license to allow unmounted distribution of its gunsights.

Please contact the undersigned directly should additional information be deemed necessary.

Very truly yours,

SELF-POWERED LIGHTING, INC.

J. Henriquez
