RE: AL Mill Evaporation Ponds 16 through 21.

Dear Ms. Goad:

In accordance with our conversation of yesterday, Kerr-McGee Nuclear agrees to visually inspect the exterior berms of the ponds 16 through 21 in Section 4 on a weekly basis and immediately after heavy storms.

Further, we intend that the specifications in our letter of June 6 and July 6, relative to ponds 18 through 21 on berm compaction and a membrane liner apply equally to ponds 16 and 17 as described in our letter of May 29.

Very truly,

W. J. Shelley
W. J. Shelley, Director
Regulation and Control
