RE: Control #30042
License #13-19451-01MD

Gentlemen,

Please make the following change in our license application for renewal of NRC License No. 13-19451-01MD. We wish to modify the physical layout of the laboratory by adding swinging bar-type doors between restricted and unrestricted areas and omit the door between dispensing area and hallway. These changes will in no way compromise the security of licensed material.

Attached is a new page 6 for Item 9. Please use this to replace the present page in the application submitted on 10/15/85.

Your consideration in this matter is appreciated.

Sincerely,

R. Kent Edwards
