January 5, 1989

Director  
Division of Industrial & Medical Nuclear Safety  
Office of Nuclear Material Safety & Safeguards  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Gentlemen:

Attached is an NRC Form 314 requesting termination of NRC License No. 21-18583-02 which expires on March 31, 1989. Please note that the licensee is Champion International; however, ownership of the source changed twice since license renewal in 1984. The first change was to that of U.S. Plywood Corporation. Shortly thereafter, the mill at which the source was located changed ownership again when Georgia-Pacific Corporation purchased U.S. Plywood Corporation.

Included with the Form 314 are copies of the Texas Nuclear, "Shipper's Declaration For Dangerous Goods" and "Acknowledgement of Receipt of Radioactive Material".

If further information is needed regarding this set of forms, please contact Larry Couture or Guenter Hennig at Georgia-Pacific Corporation, P.O. Box 558, Gaylord, MI 49735, (PHONE: 517-732-5151). Thank you.

Sincerely,

Larry Couture  
Environmental Engineer
