Docket Nos. 50-321, 50-366
License Nos. DPR-57, NPF-5

Georgia Power Company
ATTN: Mr. W. G. Hairston, III
Senior Vice President -
Nuclear Operations
P. O. Box 1295
Birmingham, AL 35201

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-321/89-10 AND 50-366/89-10

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by J. E. Menning on May 27 - June 23, 1989. The inspection included a review of activities authorized for your Hatch facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. However, because all of the criteria for categorization of licensee-identified violations were met, two violations are not being cited. The details pertaining to the licensee-identified non-cited violations are described in the enclosed Inspection Report.

Your attention is also invited to the unresolved items identified in the Inspection Report. These matters will be pursued during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,
ORIGINAL SIGNED BY
ALAN R. HERDT
