Docket No. 50-260

Mr. Oliver D. Kingsley, Jr.
Senior Vice President, Nuclear Power
Tennessee Valley Authority
6N 38A Lookout Place
1101 Market Street
Chattanooga, Tennessee 37402-2801

Dear Mr. Kingsley:

SUBJECT: NRC INSPECTION REPORT NO. 50-260/89-21

This letter forwards a report on the results of our third inspection of the Browns Ferry Nuclear Plant Unit 2 (BFN-2) Seismic Design Program conducted at the Stone & Webster Engineering Corporation (SWEC) office in Cherry Hill, New Jersey on January 23 and 24, 1989. Three open items (CSG-14, CSG-23, and CSG-26) previously identified in NRC Inspection Report (IR) 50-260/88-38 dated April 19, 1989 in the design areas of amplified response spectra generation, drywell platforms, and electrical conduit and supports were reviewed during this inspection. At the conclusion of this inspection, the status of the initial 32 issues identified in IR 50-260/88-38 is as follows. In IR 50-260/88-38, 4 of the 32 items were closed. In IR 50-260/88-39, 6 additional items were closed. In this inspection (IR 50-260/89-21), 2 items were closed. Thus, 20 of the 32 items remain open. Closure of all 32 items is required prior to the restart of BFN-2. The staff will review the resolutions of the remaining 20 open items in a final inspection to be conducted upon completion of these items by TVA.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, please contact us.

Sincerely,

Original signed by

B. D. Liaw, Director
TVA Projects Division
