Gentlemen:

SUBJECT: EXAMINATION REPORT, COOPER NUCLEAR STATION (CNS)

During the week of February 27, 1989, NRC administered one Senior Reactor Operator and five Reactor Operator examinations to employees of your company who had applied for licenses to operate your CNS facility. At the conclusion of the written examination, the written examination questions and answers were provided to your licensed operator training staff for review and comment. At the conclusion of the site visit, a brief exit meeting was held with training and operations representatives to inform them of problems noted during the onsite examination process. The Senior Reactor Operator and four Reactor Operator candidates passed the examinations and have been issued the appropriate license.

Should you have any questions concerning this letter, please contact J. Whittemore at (817)860-8294.

Sincerely,

Original Signed By
A. B. Beach

L. J. Callan, Director
Division of Reactor Projects
