QUANTITY

DESCRIPTION OF MATERIALS OR FACILITIES

The licensee is authorized to export the components and associated equipment of a boiling water reactor, with a power level of 439,300 kilowatts (electrical) valued at approximately \$25,300,000.00, including equipment and material listed in U.S. regulations 10 CFR Part 110.8(a). This amendment amends and supersedes the original license issued August 15, 1967 and all ten (10) subsequent amendments through Nov. 03, 1987.

This amendment is issued to add the following provision to the original license: Equipment, tools, components and materials covered by this license may be disposed of or returned to General Electric Company or General Electric Technical Services Company, or to another location, in the United States, or transferred to the site of another reactor exported pursuant to a facility export license issued by the U.S. Nuclear Regulatory Commission to General Electric Company or its wholly owned subsidiary, General Electric Technical Service Company (GETSCO).

No other changes are made.
