SUBJECT

GROUNDWATER PROTECTION AT Spent Acid Pond - Vicinity Property

SUMMARY

Mr. Banks called me to state that:

- ① DOE interprets data from a well immediately beneath the Spent Acid Pond to indicate that contaminated materials will not leach, and
- ② DOE will defer consideration of cleanup of existing groundwater contamination and contaminated material under Subpart B of the ERM proposed standards (40 CFR Part 192).

I told him that we would review DOE's interpretation and defer until we receive the revised REA for the Spent Acid Pond.

ACTION REQUIRED

Inform PM and other reviewers.
